

REVIEW FORM

To be used with manuscripts submitted to the *Hungarian Journal of Applied Linguistics*

Dear Colleague, We should be very grateful if you would kindly review the attached paper, which has been submitted to our journal for publication. Please provide a rating on a 3-point scale for each question, along with a brief rationale for each. The criteria below are also recommended for further consideration in the form of a more detailed evaluation discussing both the strengths and the weaknesses of the paper if you believe this is required and if time allows. The evaluation will then be sent to the author without the reviewer's name. If possible, we should like the material along with the review to be returned to us within two weeks. Your contribution is highly appreciated.

Navracsics Judit
Editor-in-Chief

PAPER TITLE

1. Is the structure of the work clearly and carefully constructed (e.g. introduction, division of the body of the text, conclusion)? Is the progression of thought developed in a coherent manner?

yes partly no

2. Does the author build upon relevant references and bodies of theoretical and/or empirical knowledge?

yes partly no

3. Does the paper offer original arguments and/or results?

yes partly no

4. Does the author provide sufficient evidence supported by adequate theoretical argument and/or empirical research methodology?

yes partly no

5. Does the paper adhere to accepted style, usage and composition conventions?

yes partly no

The publication of the paper:

- is recommended in its current form
- is recommended with some revisions
- is not recommended
